DETAILED ACTION

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-27, 48-52, drawn to automatic optical fiber testing preparation, classified in class 356, subclass 73.1.
- II. Claims 28-47, drawn to spool and pallet, classified in class 242, subclass 462.

The inventions are distinct, each from the other because of the following reasons: Inventions group I and group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the system with conveyers for conveying and preparing optical fiber does not need the particular pallet & spool of the subcombination group II. The subcombination has separate utility such as a pallet for mounting a spool & spool for winding wiring.

Art Unit: 2877

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Remark

Although claim 34 is indicated as being dependent on claim 1, claim 34 claims the pallet which should be dependent on claim 28. Claim 34 is read as being dependent on claim 28 in this restriction requirement. Applicant, however, is required to amend claim 34 as being depend on claim 28 in the following reply.
